

Job Title: Cloud Engineer

Job Summary: We are seeking a skilled and motivated Cloud Engineer to join our dynamic team. As a Cloud Engineer, you will design, deploy, and manage cloud infrastructure and services, ensuring scalability, security, and efficiency. You will collaborate with cross-functional teams to develop cloud-native applications, optimize cloud resource usage, and implement automation strategies.

Key Responsibilities:

- Design, implement, and manage scalable and reliable cloud infrastructure on platforms like AWS, Azure, or Google Cloud.
- Automate cloud infrastructure deployment and management through tools such as Terraform, Ansible, or CloudFormation.
- Collaborate with developers to build cloud-native applications and microservices.
- Monitor cloud environments, ensuring performance, security, and availability.
- Implement disaster recovery and backup strategies for critical applications.
- Troubleshoot and resolve cloud infrastructure issues in a timely manner.
- Optimize cloud cost management and performance.
- Ensure adherence to cloud security best practices and compliance requirements.
- Participate in the development of continuous integration/continuous deployment (CI/CD) pipelines.
- Provide guidance and training to other team members on cloud technologies.

Qualifications:

- Bachelor's degree in Computer Science, Information Technology, or a related field.
- Proven experience with cloud platforms like AWS, Azure, or Google Cloud.
- Experience with Infrastructure as Code (IaC) tools such as Terraform, CloudFormation, or Ansible.
- Strong knowledge of cloud networking, storage, and compute services.
- Familiarity with containerization technologies like Docker and Kubernetes.
- Experience with CI/CD tools like Jenkins, GitLab, or CircleCI.
- Knowledge of cloud security best practices and compliance frameworks.
- Strong scripting skills in languages like Python, Bash, or PowerShell.
- Excellent problem-solving and troubleshooting skills.
- Ability to work in a fast-paced, collaborative environment.

Preferred Skills:

- Cloud certifications (AWS Certified Solutions Architect, Microsoft Certified: Azure Solutions Architect Expert, Google Professional Cloud Architect).
- Experience with serverless computing and microservices architectures.
- Familiarity with monitoring and logging tools like CloudWatch, Datadog, or Prometheus.
- Experience with database services (RDS, DynamoDB, BigQuery, etc.).
