PROFILE

Frontend engineer with 6+ years of experience building responsive, performant web applications using React, Next.js, and TypeScript. Specializes in component architecture, state management, and web performance optimization. Passionate about creating accessible, pixel-perfect user interfaces that deliver exceptional user experiences. Strong collaborator with design and backend teams.

EDUCATION

Bachelor of Science in Computer Science

University of Washington

SKILLS

Frameworks & Libraries: React, Next.js, Vue.js, Redux Toolkit, Zustand, TanStack Query

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3, SCSS

Styling: Tailwind CSS, Styled Components, Material UI, Chakra UI, CSS Modules

Testing: Jest, React Testing Library, Cypress, Playwright, Storybook

Tools: Vite, Webpack, Git, GitHub Actions, Figma, ESLint, Prettier

EXPERIENCE

Senior Frontend Engineer

2022–Present

TechFlow Solutions

Remote

- Architected a micro-frontend architecture using Module Federation, enabling 5 independent teams to deploy features independently, reducing deployment conflicts by 80%.
- Led migration of a legacy Angular codebase to React + TypeScript, reducing bundle size by 45% and improving Lighthouse performance scores from 68 to 94.
- Implemented a design system with 60+ reusable components using Storybook, adopted across 8 product teams, reducing UI development time by 40%.
- Built an AI-powered search interface using React and Next.js with server-side streaming, improving search response time by 60%.

Frontend Developer

2020–2022

DigitalCraft Agency

San Francisco, CA

- Developed responsive web applications for 15+ clients using React and Tailwind CSS, achieving 98+ Lighthouse scores across all projects.
- Integrated GraphQL APIs using Apollo Client, reducing API payload size by 55% compared to REST endpoints.
- Implemented comprehensive test coverage using Jest and Cypress, achieving 92% code coverage and reducing regression bugs by 60%.
- Mentored 3 junior developers through code reviews and pair programming sessions.

PROJECTS

E-commerce Platform Migration | React, Next.js, Tailwind, Redux Toolkit

- Migrated a legacy e-commerce platform to Next.js 14 with App Router, improving Core Web Vitals (LCP from 3.2s to 1.4s, CLS from 0.25 to 0.05).
- Implemented ISR and edge caching, handling 50,000+ concurrent users during flash sales with 99.99% uptime.
- Built a dynamic product filtering system with faceted search using server-side rendering and client-side state management.

Real-Time Collaboration Dashboard | React, WebSockets, D3.js, Tailwind

- Built a real-time analytics dashboard with live data streaming via WebSockets, displaying 10,000+ data points with 60fps rendering.
- Implemented custom data visualizations using D3.js and Recharts, enabling drill-down analysis for executive reporting.

ACHIEVEMENTS

Google Developer Expert - Recognized for expertise in modern web technologies

Conference Speaker - React Summit 2024: "Building Micro-frontends at Scale"

Open Source Contributor - Regular contributor to React and Next.js documentation
